Australian College of Applied Psychology, Brisbane campus

invites you to a

Professional Development Workshop

Case Management ..... In action
A practiced based workshop offered by Katherine Reid

This workshop will be an opportunity to reflect on what case management means in action. Participants will have an opportunity to explore key models of case management practice. Strengths-based case management principles and skills will be explored in detail throughout the workshop. There will be plenty of opportunity to practice these skills within the workshop. Participants will also have the opportunity to learn how to apply for case management positions.

Katherine Reid  (BA, B Soc. Work & Soc. Policy, PG Dip in Narrative Therapy)

Katherine is a social worker and has worked in a variety of case management roles in government and non-government settings over the last 12 years. Some of the people she has worked with are women reclaiming their lives from violence and eating issues, and children and young people who have experienced significant abuse and neglect. She continues to find ways to work in client-centered and socially just ways. Katherine has also had the opportunity to offer a range of strengths based and narrative practiced based workshops. She enjoys co-creating collaborative learning spaces.
